

# Team Management Apps

## Game Day App

Available in iTunes and Google Play - Free

With the GAME DAY APP, you can:

- search, find and save the team you play for
- see your team schedule and results
- get round by round results for all the matches in your competition
- check your league ladder
- save multiple teams – check out any team you follow on SPORTS TG
- see where you're playing next week, and follow our maps to get there!
- Last time played – see the score last time you met your opponent.

### Review

- This app is easy to set up and use for individuals
- Team members can check when they are playing next, see full season fixtures, ladders
- **This app does not send SMS game reminders or Push Notifications – see below for Group SMS app suggestions**

### How to set it up

- Download the app from iTunes or Google Play
- Create a Login and Password for the Sports TG App
- Select "Basketball" as the sport (Fig 1)
- In Search, type Willy Cannons (Fig 2)
- From the list, select the team name then press the star in the top right hand corner to save this team to your main menu (Fig. 3) – BE SURE TO CHECK THAT YOU HAVE THE CORRECT SEASON ie W17 G12 Div 1 (Winter 2017 Girls U12 Div 1) and also the correct Association being Altona Basketball Association or Westgate Basketball Association
- When you save your team to the home screen, press on the team then press Fixture for your team fixture and Ladder for the current ladder

# Team App

<https://www.teamapp.com>

If your Team has created an App simply download Team App here, sign up and join your Team! Or to create your own Team App for FREE visit [www.teamapp.com](http://www.teamapp.com).

- Send news articles direct to the smartphone through push notifications – this substitutes the Group SMS reminder.
- Members can enter their availabilities for upcoming dates.
- Promote your events and club functions and manage RSVP numbers
- Set and send automatic reminders.
- Announce Newsletters, display forms and send documents to your members.
- Access ladders, fixtures, results.
- Create secure discussion groups and forums.
- Upload photos and engage in social team chat.
- Your messages are secure and only visible to groups you choose.

## Review

- This app is more difficult to set up by the Coach/Team Manager and then team members however once everything and everyone is set up it is a very powerful app which can send push notification reminders (similar to Group SMS) and has lots of other features.

## How to set it up

- The Team Manager or Coach needs to set up the app first by going to [www.teamapp.com](http://www.teamapp.com) – there are videos to help you set it up and it is quite simple however you need time to work through the set up process – this person/persons become the Administrator of the app.
- The Administrator can create User Groups – there is one already set up called Players and Officials. This allows you to put content in the app which cannot be viewed by public who are not part of the team.
- Each individual team member's parent needs to download the Team App and then create a login to Team App – this login has nothing to do with your particular team, just a login to use the app.
- The Administrator of the App can then send out invitations to the team members to join the app or the team members can search for their team and request to join the team.

## Group SMS Apps

Also handy are Group – SMS Apps – search iTunes or Google Play to find one that suits you. Here are a few suggestions:

Groups! Free – by Qbix, Inc	Groups – by Guided Ways Technologies
Text 2 Group by YT Development Ltd	Group SMS by Alco Blom
